Jim Hanley's Universe sucks less

A shocking admission: Jim Hanley's Universe is the worst place to buy comic books, except for the others

By Jim Hanley

Lets face it, all comic book stores are pretty awful places.

It's not that their owners are all unprincipled louts, (though some are) it's just that running a comics store takes some rather specialized skills. You have to know site selection, merchandising, inventory control, bookkeeping & financial control, advertising design & placement, and personnel management (to say nothing of being familiar with the business end of a vacuum cleaner).

It also helps to know what Scott McCloud calls the "Vocabulary of Comics." After all, if you can't tell good comics from bad, you'll have a hard time ordering ones that your customers will buy. These skills take a long time and a great deal of trial & error to develop and they don't come cheap.

Customer service

This brings me to the biggest hurdle for the store owner: customer service. I don't mean old saws like "the customer is always right." I'm talking about simple courtesies like making sure that every customer gets his or her comics even if it means looking in the bottom box or giving up your personal copy. Things like calling another store to find that missing issue or the right T-shirt size. These are things that most of our competitors don't seem to understand.

We suck less

Of course, we do lots of dumb things too. What sets us apart from everyone else is that we admit that our service sometimes sucks. And we work to correct it. I've found that customers will forgive us for almost any goofy thing we do as long as we do three things:

- Say we're sorry
- Mean it
- Fix the problem
- Do not do it again

(Um, four things. Sorry. I won't do that again).

Who needs Jim Hanley's Universe?

One of the most important lessons that I've ever learned is that comic book readers don't need to spend their money at Jim Hanley's Universe. Other stores carry the same comics we do. We all get them on the same day at almost the same time. So we have to keep trying to improve just keep our current customers happ (quite aside from attracting those you who don't shop with us yet). Yo don't have to buy from us, becau after all, it's still your money.

Do I have to move?

Well, if you want to shop eve week in our fairly clean, not t disorganized, marginally well stocke stores, it does help to live nearby. B I don't think this sales pitch w convince many comics fans to upro their families and move to New Yo (or New Jersey).

Luckily, we have recently decide to bring the same miserable level service that New Yorkers have com to tolerate to comic fans around th world. So now you can deal with ou mail order department, no matter wh comic book store has disappointe you in the past. Send for a fr catalogue. If we don't lose your lette we'll eventually send you one.

My parents would be so proud.

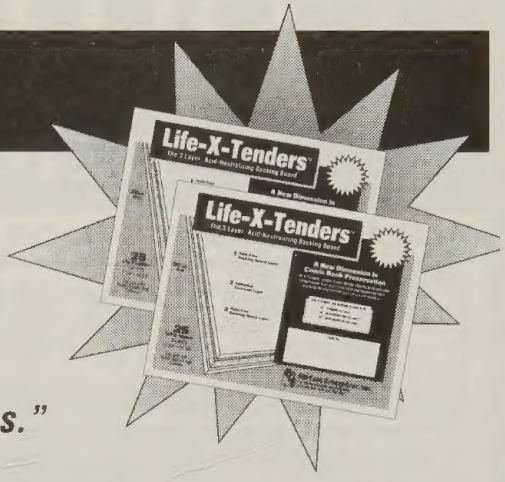
Introducing...

Life-X-Tenders™

From Bill Cole Enterprises, Inc.



By absorbing the harmful gases and other contaminants in paper as it ages, **Life-X-Tender**™ backing boards are the ***"single most important innovation in archival preservation since the introduction of Mylar® sleeves."***

A new defense in the fight against the aging process

COLLECTORS, CHOOSE YOUR WEAPON

Non Archival Boards

Ordinary cardboard only adds rigidity to your paper collectibles during storage. However, any non-archival backing boards will break down over time and release acid and other contaminants that will migrate into the paper your collectible is printed on, damaging the item you are trying to protect.

Archival Quality Backing Boards

Acid free, archival quality backing boards (like those sold by BCE) will also add rigidity to your paper collectibles during storage. However, archival quality backing boards will not break down over time nor will they accelerate the aging process. These boards are perfectly safe to use for storing your collectibles.

Unless you deacidify your collection before storage, the paper it is printed on will become acidic over time and the paper will yellow. Proper use of new **Life-X-Tender**™ backing boards gradually slows the aging process

NEW Life-X-Tenders™

Only **Life-X-Tender**™ backing boards can protect your paper collectibles from virtually everything, including the harmful gases in the paper they are printed on.

As the paper in your collectibles ages, it releases acids and other contaminants. New **Life-X-Tender**™ backing boards continually absorb and neutralize these contaminants, retarding the aging process and preserving the value of your collection.

For added protection, serious collectors will want to use **Life-X-Tenders**™ in place of regular archival backing boards.

FOREWORD

by Harry A Hopkins

After my two years in Korea, serving with the United States Air Force, it's truly a pleasure to finally be back in the States and back at the helm of FANDATA Publications. During those two years we were unable to publish Fandom Directory. Mariane and I are delighted to be back in the business of publishing Fandom Directory.

One of the hazards of running a small business while still being a member of the US Air Force is that at any time they may decide to send you on an overseas assignment which will take away your ability to do business That is what has happened to us, FANDATA Computer Services, Fandom Directory, and the International Fan Location Service

But, since thousands of customers had come to rely heavily upon our fan network lists, I could not just let things drop for the two years we were in Seoul. So. I turned over all the data to Bill Cole and Gary Schlegelmilch to keep the data alive. I want to publicly thank Gary and Bill for their dedication to excellent service and their friendship in helping me keep FANDATA alive. Thanks guys!

Upon our return to the States in September 1995, we set about refreshing the information in our data bases and sent out 22,098 post cards. 9,711 of you responded. This was quite OVERWHELMING!! We had not realized that Fandom Directory would be missed so greatly. It is truly gratifying to know that our past work has been appreciated.

But, we do not intend to rest on our past. This edition is proof that we are back and again publishing with the same accuracy and quality preparation that you have come to expect and to deserve.

On top of our regular features, we have added a lot to this edition. You've probably already noticed that we have added ten new interest codes (see page 22 for a complete list.) They are: Adult Material, Alien Nation, Babylon 5, Card Gaming (such as Magic: the Gathering), Computer Software, Quantum Leap, Red Dwarf, Star Trek: Deep Space 9, Star Trek: Voyager, and X-Files.

Eighteen additional interest categories are awaiting a sufficient number of fans to state them as one of their "other" interests before we assign them a code and add them to the data form. They are: Board Gaming, Dark Fantasy, Forever Knight, GI Joe, Graphic Novels, Highlander, James Bond, Juvenile Books, Klingons, Oz, Phone Cards, Robin of Sherwood, Romulans, Stephen King, Sherlock Holmes, U.N.C.L.E., UFOs, and Wargaming. If you are interested in any of these, be sure to fill out one of the data update forms in this edition and write them in under "other."

In the Electronic Communications Index, which begins on page 267, in addition to facsimile numbers, you will find Internet addresses there for the first time. The email world is exploding! We already have 823 Internet addresses listed. If you want to include your email address in the next Fandom Directory, you can email me your address at either 72245.1224@compuserve.com or hopkinsh@aol.com.

Our cover artist this year is Istvan Kuklis from Hered, Hungary. (Istvan, I assure you, Springfield looks nothing like that.) We'll have to have you over soon so you can see for yourself.

In the Fandom Directory Artwork Contest, we received 129 contest submissions from 84 different artists for judging in this year's contest. The judges awarded the Grand Prize ($250) to David Jahn of Maplewood, Minnesota and the Best of Theme Prize ($100) to Ivan Gregov of Zagreb, Croatia. The judges also awarded 10 Second Prizes and 11 Honorable Mentions (instead of the usual 8).

As you know, zines, clubs and cons must recertify their continued activity with us each edition in order to be listed. This year, 554 fan publications (see page 27) and 1,048 fan clubs (see page 127) submitted information. Also, a record number of 960 conventions (see page 71) listed their conventions between now and the year 1997.

Randall Scott returns this edition with his twelfth listing of Research Libraries of Interest to Fandom. He now lists 135 libraries (see page 172) with special collections or special sections of interest to fans and researchers.

Starting on page 292, James A. Bateman also returns this edition with 150 computer-based bulletin boards which have subjects of interest to fans or which have whole sections set aside for fan-related discussion and files. If you log onto a BBS that you think should be listed in Fandom Directory, have the SYSOP contact either Andy or myself and we'll see they get into the next edition.

Finally, this edition of Fandom Directory is brought to you by 143 different advertisers who have placed 65 pages of advertising to help cover the cost of publishing this huge, 608-page edition. This is the largest, and, hopefully, the best Fandom Directory ever. Let me know if you agree, or if you don't, let me know how we can improve. There's always room for improvement.

Again, it's great to be back. Thank you for your continuing support.

Movie Club is the quarterly movie magazine that features today's most recognized and respected film writers and reviewers — Don Leifert, Tom Weaver, Gary Svehla, Gregory Mank, Bryan Senn, and many others — who bring readers a fresh, no-nonsense entertainment publication devoted to classic horror, sci-fi, independent and B-movies, video and TV.

With its clean design and quality printing, Movie Club is quickly emerging as the magazine of choice among fans. Photo-filled features in our first four issues include: Jurassic Park — a comparison of the modern hit to 11 classic dino films • Great coverage of all the Universal/MCA releases of classic horrors • A look at the wild and wacky "Juvenile Delinquent" films • The forgotten Ape Woman movies • Republic's latest serial releases • Invisibility in the movies—from the classics to later spin-offs • A tribute to Vincent Price • Unsung Gems—terrific movies you rarely read about • Giants in the movies • An eye-opening, exclusive interview with actress Mara Corday, and much, much more!

FANDOMONIUM

A FANDOM TALK SHOW

Airing in the first quarterof 1995 on StPaul public access cable, this promises to be a revolution in the way we all look at fandom and gives us an additional outlet for fandom association.

By no means a pure-news show, we aim for an atmosphere balanced between committed enthusiasm and sheer fun, the latter of which being the whole reason we're all in fandom to begin with!

Content of the show can range from fan clubs to fan artists and musicians to the less frequent pro author, local dealer or retailer. Main focus of the club will always be the everyday fan and fanclub, and thus, we'll tape in an environment conductive to fan interest while also entertaining almost all who see the show!

David Letterman, Saturday Night Live, and maybe a little Wayne's World will come to mind as you watch the show; plenty of comedy is to be had, for sure. At the same time, we aim to have the same factual foundation requisite to any talk show.

Ever heard the expression "the best things in life are free?" Free membership, free appearances. Feel free to apply for either or both at the address/phone below!

To schedule an appearance or to join, write &/or call:

FANDOMONIUM
PO Box 75154

Next time you're in town, let's do lunch....and then we'll do the show!

RESEARCH LIBRARIES OF INTEREST TO FANDOM

Compiled by Randall W. Scott

This is the twelfth RLIF directory, listing 135 libraries whose collections and policies indicate that they are of special interest to fandom. Updates and omitted or new information are always welcome and should be sent to Randall W. Scott, Michigan State University Libraries, East Lansing, Michigan 48824. Phone: (517) 355-3770. Fax (517) 432-1445.

Except where explicitly noted, the information is based on personal correspondence or visits to the libraries listed. The data on these collections is as accurate as I can make it as of January 1995.

Two groups of users are envisioned for this directory: readers and researchers who need the resources of a collection larger or more rare than they themselves can amass, and collectors, dealers or publishers looking for places to donate or sell their material. I have tried to include only collections that give the interests of fandom some pride of place, either by making their material non-circulating or through other special handling or designation.

Important: Call or write before you visit any of these libraries. One of the librarian's duties is to protect the collections for posterity. If you make yourself known in advance, we're less likely to seem like we're protecting the collection from you!

HOW TO USE THIS LISTING

The entries in this listing are printed in alphabetical order. Each entry consists of a name, a state or province and a zip code. In the case of a country other than the U.S. or Canada, no zip or postal code is listed; instead the first six characters of the country's name are listed. To look up the full address, telephone number, status and interests of any entry, simply thumb to the state, province or country listed in the Zip Code Listing which begins on page 410. An asterisk ("*") in front of a name indicates a retail store which can only be found in the Retail Stores Index beginning on page 301. For your convenience we have included at the right a complete list of the two-letter state and province abbreviations used by the U.S. Postal Service.

LAST MINUTE ADDITIONS & UPDATES

The following listings were all received at the last minute. All these entries were received between February 15th and 18th Some of them are new entries, and some of them are updates to past listings These names appear in none of the other indexes or listings in this edition They were pasted up just prior to delivery of the final pages to our printer on the 20th. These entries made it in at the last second, but each year there are dozens of disappointed people whose data forms arrive too late for inclusion in the current edition. To avoid missing out, please get your information in early. **These entries are arranged alphabetically by name.**

AN IMPORTANT DECISION FOR ALL SCI-FI FANS

Would you rather:

a.) CONTINUE TO OVERPAY for your Science Fiction Collectibles

OR

b.) GUARANTEE YOURSELF THE BEST VALUE in the entire industry?

At last, one toll-free call from any telephone in the US or Canada guarantees you the best value on science fiction collectibles.

A group of sci-fi fans has launched a catalog venture designed to change the way fans buy merchandise by mail. At first glance, 800-TREKKER could be just another entry in the endless galaxy of science fiction collectible retailers. However, some important differences make this organization worth looking into.

Best of all Worlds

800-TREKKER combines the energy, enthusiasm and courtesy of fan-run organizations, with a high level of professionalism not always found in purely fannish ventures.

While fans prefer to buy from other fans (rather than from large, impersonal corporations), they also want to know that they have made the best buying decision possible. *800-TREKKER guarantees it.*

The 800-TREKKER Advantage

Since the company is actually run by fans who have bought science fiction collectibles themselves, they have an unfair advantage over purely commercial ventures. They actually care about providing quality products and value to their customers. What a concept!

Of course, every company in existence promises quality, value and service. What makes this group different? Plenty.

800-TREKKER has introduced a totally outrageous, customer satisfaction guarantee. If you're not completely satisfied with your purchase, just send it back for a full refund, exchange or credit within 90 days!

800-TREKKER president David Blaise says, "We want the words guaranteed quality, value and service to mean something."

800-TREKKER marks the end of the "all sales final" mentality so common in the industry.

Best Price Guarantee

In addition to the customer satisfaction guarantee, 800-TREKKER also offers another groundbreaking advantage. If you buy a product from 800-TREKKER and then find it advertised for less money elsewhere within 90 days, they'll refund the difference *plus* an additional 10% of the difference. This guarantees that customers always receive the best value and price.

In a Nutshell

The concept is simple. Provide fellow fans with a great catalog, unrivaled guarantee, and a toll-free number that is nearly impossible to forget.

"Once you've heard our name," says Blaise, "you have our telephone number memorized. 800-TREKKER. It doesn't get any easier than that."

Do yourself a favor. Take this magazine, go to the nearest telephone and dial 1-800-TREKKER.

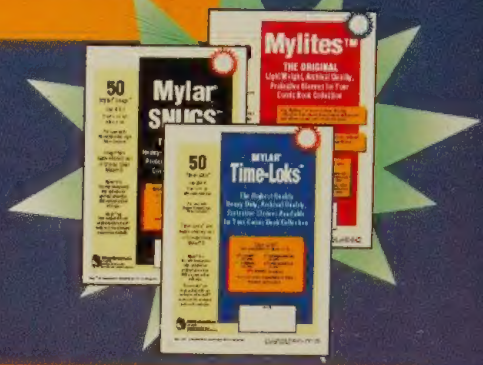
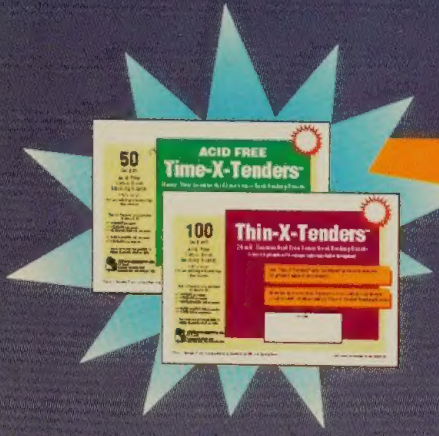
Your Collectibles Books Are Dying

Save them with the Only True Archival Quality Preservation Supplies

Mylar® Sleeves (Made entirely of Mylar® type D)

Many manufacturers claim that their sleeves are archival when they are not. These inferior quality sleeves will ruin your paper collectibles. True archival quality sleeves must meet the standards set forth by the Library of Congress and the National Archives. **BCE offers three sleeves in different weights and configurations that meet these requirements.**





Genuine Acid-Free Backing Boards

Don't take a chance with boards that are so called "acid free". True archival, acid free boards must have both a minimum pH of 8.0 - 8.5 and a 3% calcium carbonate buffer throughout - not just on the surface. **BCE offers two boards in different thicknesses that meet these requirements as well as *NEW LIFE-X-TENDER™ BACKING BOARDS*.**

Acid-Free Boxes

Preserving paper collectibles can only be done by using true archival supplies. Skimp on one item and your entire collection could become worthless. **BCE offers five genuine acid free boxes made from the same basic archival material as our acid free backing boards, only in a heavier weight.**

Independent Laboratory tests show that many preservation supply manufacturers claim their products are archival when they are not. Don't be fooled.
